PROPOSALS

For Publishing, by Subscription,

THE COMPLETE WORKS OF

SIR WALTER SCOTT:

With a Biography: being the first American (and only) edition which contains the Author's last additions and illustrations, arranged upon their respective pages.

A COMPLETE and uniform edition of the various productions of the great 'Minstrel of the North,' is a *desideratum* with the American public. No library is complete without them, and no edition extant is sufficiently compact for such a repository; while the endless number of editions, *without any uniformity in size*, heretofore published, besides being exceedingly cumbrous, are far too voluminous and expensive to be within the reach of the great majority of readers. The undersigned therefore announce, that they have now in press, and will issue, an edition of the Works of Sir Walter Scott, which will embrace all his Poems, Novels, Histories, Biographies, and Fugitive Compositions, as well as the Biography and Private Correspondence, now in the course of publication in England, under the superintendence of Mr. Lockhart.

1st. In Parts: each Part embracing as much matter as is contained in two volumes of the present editions of the Waverley Novels, which will be put at the unprecedented low price of THIRTY SEVEN AND A HALF CENTS.

2d. Two parts will appear each month; but should the publishers find the work to meet the patronage they anticipate, FOUR PARTS will be issued monthly.

3d. The whole will be completed in *seven volumes, or forty eight parts.*

The paper on which the above is now printing, has been made expressly for the purpose; the present parts may, therefore, be considered a fair specimen, in every respect, of the whole work; but, should dissatisfaction arise with any subscriber, owing to an inferior article being offered, he may discontinue at any time, and have the amount paid returned.

Note.—The publication of the first volume is deferred until the receipt of the Biography, Private Correspondence, and the New Edition of the Author's Poetical Works, with 'contemporary criticism—various readings—and correspondence with some of the most eminent persons of the time when the Poems first appeared,' now in the course of publication in England.

Volume 1 will be ornamented with an excellent Portrait of Sir Walter Scott.

DAILY PITTSBURGH GAZETTE.

WEDNESDAY AFTERNOON, OCT. 23, 1833.

☞We have received the communication of "A Sufferer," complaining of deception practised, as is alleged, by the agent of the fast line of stages, in Philadelphia.—The complaint is, probably, well founded—and if it is, the injured persons should make their charges in a more formal shape than by an anonymous communication.

THE PENNSYLVANIA CANAL.—The following statements of the amount of tolls received on the New York and Pennsylvania canals, during several years, that the prospects for our improvements are by no means discouraging. We extract from the Pennsylvania Reporter:—

"It is known to every body, that Pennsylvania has expended, and is expending, large sums; that the works finished, and those under contract, when completed, will cost upwards of twenty millions of dollars. It is also known that the governing principle with our Legislature has been to complete the whole work, and that, by adopting this course, the income from tolls has been postponed. It is also known, that the amount of tolls received upon our canal, in 1830, the 5th year after its commencement, was $27,012 90

1831, the 6th year,	38,241 20
1832, the 7th year,	55,250 22

It is also known, that notwithstanding the frequent interruptions during the present season, owing to great and sudden freshets, and accidents incident to all new works of this kind, that the amount of tolls received up to the first of September, exceeds one hundred and ten thousand dollars! and that, from the facts before us, and the business now doing on the several lines of canal, it is reasonable to believe that the tolls, this year, will reach to two hundred thousand dollars, although the rail road over the mountain, and the Columbia and Philadelphia rail road are not yet in operation, and are important links in the great connection between the cities of Philadelphia and Pittsburgh."

Again—

"It is also known that the New York canals about which so much is said and published by the enemies of the State administration, reached their present productiveness, gradually. That they received for tolls in that State, in 1820, the 4th year after the commencement of the work, $5,437 00

1821, the 5th year " - -	24,386 00
1822, - - - - -	64,071 00
1823, - - - -	153,099 00
1824, - - - - -	340,642 00
1825, - - - -	521,343 00
1826, - - - - -	750,750 00
1827, - - - -	848,759 00
1828, - - - - -	897,265 00
1829, - - - - -	771,685 00
1830, - - - - -	1,059,922 00
1831, - - - - -	1,223,802 00

It is also known, that this is the 8th year since the commencement of the public works in Pennsylvania. The gradual increase in New York, as exhibited in the foregoing table, shews the injustice of comparing the receipts and business upon our canals, in the *eighth* year after their commencement, with those of the New York canals, the *seventeenth* year after their commencement."

Extracts of a letter, from Gen. A. Lacock, dated

HUSTON'S FERRY, near the Vienna Falls, Green River, Ky., Oct. 4, 1833.

"On the first day of this month we arrived here, and found the commissioners on the ground—we immediately commenced operations, and have been engaged ever since. We have taken the levels of Vienna falls, and Hog's falls, 20 miles further up the river; to 'morrow we shall locate the works on the Vienna, or what is called the Great falls, and the next day we shall start for the next falls below, about 50 miles by water, 30 by land, and then close our examination. I think we shall be thro' the field work in about ten days from this time; say about the 15th or 16th of this month." * * * * * * * * *

"I never have seen a more beautiful stream for slack water navigation in my life; by a single dam, of 8 feet high, at the head of Vienna falls, with a canal, of 150 rods, below, with two locks, we shall complete a steam boat navigation for above ninety miles—in short, we have found every thing connected with the navigation of Green river, more favorable than had been anticipated. Stone, lime, timber, &c., &c., in abundance.—We are in comfortable quarters, and have been treated with the greatest kindness and attention by every body we have met, and since we left the Ohio river, have not met with a single mosquito."

From the New York American.

AN ESSAY ON THE SPIRIT AND INFLUENCE OF THE REFORMATION;

By C. Villiers, some time Professor of Philosophy at Gottingen—translated from the French, with an Introductory Essay, by Samuel Miller, D. D., Professor in the Theological Seminary at Princeton, N. J.—Philadelphia, Key & Biddle.—This Essay obtained the prize on the following question, proposed by the National Institute of France: "What has been the influence of the Reformation by Luther on the political situation of the different States of Europe, and on the progress of knowledge." Such a question, allowing immense range, and involving the deepest interests, required not only learning and research for the adequate discussion of it, but an unprejudiced and well disciplined mind. The author, who in this essay seems to have brought to the work all these requisites, was a soldier of the army of *Conde'* at the outbreak of the French revolution—a Frenchman and an emigrant, his talents procured for him the station of Professor at Gottingen; and, not himself an ecclesiastic, he entered for and bore away the prize proposed for the discussion of a subject on which ecclesiastics chiefly might have been expected to write. They who have read Moore's Travels of an Irish Gentleman in search of a Religion, will find causes and effects stated in this work which that volume certainly does not view in the same light; and all Protestants will be gratified by this exposition of the benefits which have resulted to the world at large—to freedom, to industry, and to the spread of knowledge—from that Reformation whence they derive their distinctive name.

The preliminary remarks of the Rev. Dr. Miller, are well fitted to prepare the reader for the Essay, by recalling briefly the state of superstitious vassalage enforced by usurped temporal authority, under which Europe groaned when Luther broke the bonds of the church.

Of a work like this no idea can well be communicated by quotations. We annex, therefore, only a short extract concerning our own country, from that portion of the book which discusses *the influence of the Reformation* upon various Christian countries:—

"*United States of America.*—It is sufficient to name this new state, which is wholly European, upon the soil of America, to bring to mind that it was created by the partisans of reform and of liberty, flying from the oppression and intolerance of parties. If the English emigrants, who had sought shelter on the continent of Europe, during the course of the troubles which have been spoken of, brought back with them the seeds of discord and of hatred, those who took refuge in the solitudes of Pennsylvania, acquired peace and toleration there. They founded Philadelphia, *the city of brothers;* certainly the most pleasing name that ever was borne by the residence of man. Escaped from the tempests, to this distant coast, restored to nature and the primitive destination of the human race, these colonists, who had taken their knowledge with them, had leisure to reflect on the origin and rights of societies; on the respective duties of governments and nations. Having besides an entirely new political body to organize, the elements of legislation must necessarily engage their attention first. We have, consequently, received from thence some admirable precepts, and still more admirable examples. It is known that, after having returned under the dominion of the mother country, this association of free and energetic men, of almost all countries, afterwards determined to resume the governing themselves. Louis XVI. seconded them in this enterprize, and sent an army thither. The French, who composed it, came as friends among these republicans, were admitted into their confidence, and, for the first time, saw this spectacle, to them so surprizing, of simplicity of manners, of evangelical peace, among men who supported their rights. Reflection arose with them; they compared the principles and the government of their own country, with what they observed among the descendants of Penn, and it is notorious how eminently these Frenchmen, who were thus made soldiers of liberty by a monarch, showed themselves to be so in effect, during the first years of the revolution. Among the great number of proximate and remote causes which contributed to it, the American republic, and the reformation from which it sprang, must not be forgotten.

This state, still weak, at a distance from Europe, has not hitherto had much direct influence on the political system. But who can calculate that which it may one day acquire on the colonial and commercial system so important to Europe? Who can foretell all that may result in the two worlds, from the seductive example of the independence conquered by the Americans? what new position would the world assume, if this example was followed? and without doubt it will be in the end.—Thus two Saxon monks will have changed the face of the globe. The Dominican Tetzel, came impudently to preach indulgences at the gate of Wittenberg; the open and vehement Luther was indignant at it; he raised his voice against the indulgences, and all Europe was affected, put into a ferment, and inflamed. A new order of things was the result; powerful republics were founded. Their principles, still more powerful than their arms, were introduced into all nations. Hence arose great revolutions, and those which may yet arise, are, doubtless, incalculable."

This essay was written twenty years ago; and what was then prophetic only, as to the future influence of American independence and American institutions, upon the political and social systems of Europe, has already become historical.

The Montpelier (Vt.) Watchman gives a detailed account of the proceedings of the Grand Lodge at their recent meeting. It appears that the resolutions which were rejected by a vote of 79 to 41, were of the following tenor. The first provided, that every chapter or dispensation granted by the Grand Lodge, by which members of the fraternity were authorized to assemble as masons, with the usual privileges and powers, should be revoked and annulled, said lodges declared to be dissolved, and all their rights and privileges, so far as the same are derived from the Grand Lodge, held for naught. The second proposed to authorize every such lodge to dispose of its property in such manner and for such purposes as it might deem expedient. The third declared, that the Grand Lodge should be held to be dissolved and extinct, that the Masonic fraternity in the State should cease to exist as an organized body, and that its members should be absolved from all allegiance to itself or any subordinate lodge. After the rejection of these resolutions, another of the following character was introduced and passed.—It declared, that the Grand Lodge is ready to receive and revoke the charters of such lodges as may desire to surrender them at this time, and that each lodge is authorized to surrender its charter and records at any time previous to the next annual meeting and to appropriate its funds as it may deem proper; it being however recommended by the Grand Lodge, that they be appropriated to the Common School fund of the State.

Cash Duties.—We are now feeling the injurious effect of the system which has been substituted for the liberal policy established by our fathers.—The cash duties were intended to check importations, by cutting off the facility growing out of bonds on time. They have produced this effect only in a slight degree. There will always be cash enough to pay the duties on all goods which can be imported at a profit. But the new policy has accumulated a surplus on hand, which has already made much trouble, and will only be a source of evil so long as it is continued.

It is another ill effect of cash duties, that they drive persons of small capial from importing, and give the business to the rich. Another effect is, to confer a special advantage on foreigners over our own citizens, inasmuch as they procure cash at a much cheaper rate than we do.—*N. Y. Jour. of Com.*

The Hall of the House of Representatives, at Washington, is now undergoing considerable alterations and improvements; all of which, however, will be completed in sufficient time for the meeting of Congress. The floor has been raised, and a handsome gallery erected over the lobby which was formerly behind the speaker, whose chair now stands at the north enterance; thus reversing the position of the members' seats. The Hall has been also repainted, and newly carpeted; and several improvements made in the offices attached to the House.—*Philadelphia Chronicle.*

It appears, by the Paisley Advertiser, that Mr. Blair, manager of the Johnstone Gas Works, has made a discovery, which, if it become of general application, will, in a great measure, ruin the Sheffield cutlers. Some time ago, a portion of the moist lime, by which the gas is purified, fell by accident on the back of a dog, and a small bit of wood having been used to scrape it off, the hair was at once brought completely away with it.—Mr. Blair extended the discovery by practicing on his own beard, which now requires no razor. The lime, of the consistence of cream, is laid on the beard, and, after three or four minutes, scraped off with the back part of a knife, or a thin piece of wood.—*Scotch Paper.*

Among the Organic Remains found in the Marlpits of Lucas Benners, Esq., in Cavern County, North Carolina, are the following:

"Several pits have been dug, some of them to the depth of 25 feet below the surface of the earth, and ten feet below the present surface of the river. In the course of these excavations a great variety of interesting organic remains has been found, consisting of sea shells, bones and teeth of fishes, and the bones of land animals of prodigious size. Mr. B. mentions that the following is the order in which these remains have been found:—1st. Sharks' teeth, and the fragments of bones of marine fishes mingled with sea shells. 2d. Teeth, horns, hoofs, ribs, vertebræ, &c., of quadrupeds that inhabited the land, mingled with sea shells of great variety. These remains of land animals are found at the depth of from 20 to 25 feet below the surface of the earth. Among them are recognized with certainty the teeth of the great mastodon (Mastodon giganteum of Cuvier,) the hoofs, horns, and verterbræ of an elk of great size, and the teeth of an animal supposed to be the hyena.

"That was certainly a strange world in which such animals as these browsed and prowled! and, it might seem, scarcely compatible with the coexistence of man in his rude state, armed only with the bow and the club."

The Deposits, Money Market, &c.—In the month of October, there will be deposited in the three Banks of this city one million six hundred thousand dollars. The estimate for November, in bonds, is one million three hundred thousand dollars, and about eight hundred thousand dollars in cash duties—making, in all, nearly four millions of dollars belonging to the people. It appears, therefore, that in two months, only deposits will have been made to an amount nearly equal to the capitals of these three banks. *What security do these banks furnish the Government?* and how do other sections of the United States participate in the benefits of the immense collections and deposits in this District?—Formerly they were collected here, and distributed fairly throughout the Union. Now, we should be glad to know what these local banks are doing, with the money belonging to the country. Are they making preparations to loan portions of it in Ohio, Kentucky, the western parts of Pennsylvania, New York, and Virginia? We must make inquiry, with regard to the state of Exchange. If the price of drafts from the Western and Southern countries, of New York have risen, then we shall be satisfied that there is no distribution. Perhaps we New Yorkers ought not to complain, and we would not unless we had strong reasons to believe that the deposits are too much used in the business of stock speculation. We should be glad to know whether any or what arrangements have been made with a certain bank in Albany to participate in the profits and use of the deposits? Peradventure they are to have the distribution of the *Pension* money in this State, which is more than equal to one third of the public revenue. We can tell a story with regard to the pension money, and may do it, for the purpose of testing the pure principles of democracy which control the managers of the Little Belt at Albany.—*N. Y. Evening Star.*

From the North Carolina Watchman, Oct. 5.

LUDICROUS ACCIDENT ON THE PETERSBURGH RAIL ROAD.—A friend of ours yesterday related to us the following amusing fact. One day this week as the train of cars was passing down from Petersburgh, the passengers perceived that their speed began sensibly to diminish; they supposed that the engineer was letting off the steam, at length they came to a stand still, and much to their astonishment they discovered that the Locomotive had disappeared. But how, or where it had gone, or what had become of it, no one could for a moment imagine. It was at length, however, discovered that the locomotive had some how or other become disengaged from the train of cars, and had made off like a streak of lightning without any one's perceiving it. This occurred a few miles from Belfield, and this self moving machine ran eight miles without stopping; the fire at length dying away, it then called a halt and waited for company. As may be supposed, the natives were not a little surprised at the strange apparition of this flaming monster rushing over the road unattended by any human being,—some thought it was the tariff—some Nullification—some said it was one of General Jackson's Expresses, and some thought it was Lucifer himself in the shape of a Steam Engine taking a little brush against time. How it was that the Engineer and Co. had quitted their charge at the moment we did not learn. When he perceived how matters were, he tore off on foot after the Engine, and coming to a house, he mounted a horse and went in pursuit. The passengers thus being left in the lurch, put their shoulders to the wheels, and by dint of great exertion got the train up the ascent at which they had happened to be when the adventure occurred.—Here a decent commencing they all got in, and without horse power or steam or any other agent than the all pervading force of gravitation, they were merrily whirled along to Belfield—distance about a mile and a half. Our informant remarked that our friend W. B. M. of Wilmington did this office of wheel horse very well in carrying up the cars. His bodily strength was perhaps never more strenuously applied; and when the immediate difficulties were surmounted, the awkwardness of their situation was a fine subject to him for merriment.

At Belfield they remained that night, and next morning took the train of cars for Blakely.

Mr. Adams' much abused and misrepresented administration bore the burthen and obloquy of a defalcation on the part of *one* of the Auditors of the Treasury. There was no species of calumny to which the guilt of that unfortunate man did not give rise. Suppose even handed justice were to be meted out to Gen. Jackson's Administration on the same grounds, how would the case stand! We verily believe there have been more roguish Jackson Postmasters detected in stealing money, since Gen. Jackson's election, than ever occurred before with *all* the Government officers during the same period of time.—*Alex. (D. C.) Gaz.*

In the Court of Common Pleas, Judge Ward, yesterday, a case of some interest was tried. It was an action brought by Emilino F. B. Mundrucu, formerly a Major, in the Brazilian service, who now resides in this city, and is a dealer in clothing, against Capt. Barker, of the steam boat plying between New Bedford and Nantucket. The nature of the action was for a breach of contract, in not carrying the plaintiff, his wife, and child, together with his horse and carryall, from New Bedford to Nantucket, in November last. The facts were that the plaintiff had agreed to pay the full fare in the steam boat, and that after his baggage was received on board, the Captain refused to admit his wife into the ladies' cabin, the plaintiff being a mulatto, or person of color, and required them to go forward, which the plaintiff refused to do. Himself and his baggage were then sent on shore, and the plaintiff was obliged to take passage in a packet, after some delay. The case was argued by David L. Child and Daniel Webster, for the plaintiff, and by C. P. Custis, for the defendant. The jury were out 4 hours, and after receiving further instructions from the Court, returned a verdict of $125 damages. The defendant, we understand, has appealed. The court room was much crowded during the trial.—*Boston Advocate.*

Mad River Rail Road.—The great amount of Rail Road Stocks recently brought into market, together with a scarcity of money at the moment prevented the Commissioners from obtaining subscriptions to more than a small proportion of their stock. Some of our most sagacious capitalists however took moderate amounts.—*Nat. Gaz.*

A good one.—It is mentioned in a West Chester, (Pa.,) paper, that so great was the zeal of a certain Mr. Painter, of that place, in electioneering and distributing tickets, on the day of election, that he actually forgot to deposit his own vote in the ballot box!—*Balt. Pat.*

It is deemed one of the most alarming signs of the times, in our Republic, that men of personal distinction and social rank—men who could by independent exertion of their faculties, obtain an adequate and honorable livelihood,—yet sacrifice their old opinions and connections, their personal consideration, and we may suppose their self esteem also, at the shrine of official patronage and power. There is no book relating to the revolutions in France since 1791, which lowers more our estimate of human nature and excites generally greater disgust and pain, than the *Dictionary of Weathercocks*—a dreadful, though it may seem to be an amusing record of the levity, versatility, prevarication and prostitution of numbers so gifted and otherwise circumstanced that they might have perserved their consistency, and consciences, without losing the ordinary comforts of life, or the means of serving creditably and efficaciously their whole country. Predominant selfishness, immoderate or irregular ambition, cowardice, the influence of bad example, lightness of head and heart, betrayed them into servility, apostasy, and a frequent antithesis of political sentiment and conduct, which, in as many cases, involved them in ruin or disgrace as it raised and established their fortunes.

When final preferment or what is deemed full success attends such courses, it is notwithstanding a wretched affair. The weathercock or the votarist may be greeted as usual in social intercourse,—he may appear to be countenanced and valued,—he may draw the homage of persons pursuing his own career,—he may be important to particular associates and aspirants,—yet he cannot respect himself,—he cannot but know that others do not really respect him,—he finds his situation comparatively hollow and sterile. Mr. Burke well remarks—"Contempt is not a thing to be despised. No man by lifting his head high, can pretend that he does not perceive or does not feel the finger of scorn which is pointed at him on every side." To follow and to bow to fortune is one of the vulgar propensities of our nature, and it may become so common as to be thought venial by the multitude; the gratification of it, however, has never compensated men capable of understanding its character and effects. Honor is the moral conscience of the truly wise as well as great—"the noble mind's distinguishing perfection;" it is never violated with impunity except by desperadoes, who are thoroughly hardened against remorse and all opinion of any part of the world. We repeat, that when, in a republic, it is disregarded or trampled upon by high officers of state, and such persons as we specified at the beginning of this article, the degeneracy is sad and portentous. When it becomes their privilege and practice to throw off all restraints in the sphere of politics, to make any sacrifice to personal objects or party connexions, the corruption and dissolution of institutions must speedily follow.—*Nat. Gaz.*

Interesting.—The editors of the New York Gazette are indebted to a mercantile house in that city, for the following, which was cut from a Western paper, and enclosed in a letter.

Indian Treaty.—We are informed, by the Rev. J. F. Schermehorn, commissioner, &c. west, who has just arrived here from Chicago, that Gov. Porter, Col. Owen, and Weatherford, commissioners on the part of the United States, concluded a treaty last week with the Pottawatamie Indians, for all their lands on the west side of Lake Michigan, and the St. Joseph's and Nottawapsippi Reservations in the peninsula of Michigan, being about 5,000,000 of acres, and that they have agreed to remove west of the Mississippi within three years. By this treaty, the United States agree to pay the Indians $1,100,000, and to cede to the united Chippeway, Ottoway, and Pottawatamie nations, five millions of acres of land, on the north east side of the Missouri river, to commence at the Nodaway, and running up the Missouri to the Boye river, and extend east to the west line of the state of Missouri, and the lands of the Sauks and Foxes. The United States have now extinguished the Indian title to all the lands south of the Wisconsin and Fox rivers, Winnebago Lake, and Greenbay; and a very fine and valuable country will soon be open for the settlement of our enterprizing and industrious citizens. The Indian title to all the lands within the States of Indiana and Illinois has now been extinguished, excepting about 1,000,000 acres, of the Miamies on the Wabash, with whom we are informed a treaty is to be held next week, at the Forks of the Wabash, by Gov. Porter, J. F. Schermerhorn, and Gen. Wm. Marshall, Commissioners on the part of the United States.

Even the New York Evening Post expostulates with the official paper the Globe for its coarseness and rancor! The fastidious Post says:—

"The Washington Globe, it must be confessed, gives very frequent occasion for such rebukes as the Richmond Enquirer gives."

"The editor of the Globe should keep more constantly in mind that there may easily be, between conscientious and intelligent men, who think alike on most topics, a wide difference of opinion on some. There is a want of courtesy, of amenity, of a spirit of kindness and tolerance in the Globe, which is the occasion of much needless and sometimes very harmful asperity. The number of that journal which comes to us by the very mail which brings the above admonition from the Richmond Enquirer, stigmatises the Charleston Patriot as a "Bank organ." The Charleston Patriot is a paper conducted with good sense, talent, principle, and urbanity; and it should not be branded merely because it doubts the constitutional power of the Executive in one particular. In the fierce contests which the Globe has been called upon to wage with bitter political opponents it has acquired a habit of inactive, which sometimes, involuntarily, we should hope, breaks out when speaking of those who have a right to more respectful treatment."

In the Virginia Farmer's Register, there is a curious article on "the former unhealthiness of Mobile, and the beneficial change caused by paving the streets with shells."

"The shells that are used are cockle, or sea muscle, as some call them. They are the size of a half dollar, to that of a dollar, of the form of a clam shell, and they are pretty thick and solid. They abound about the shores of the bay, and are contained in large banks, upon the marsh islands, opposite and above the city; perhaps being the *nuclei* upon which those islands were formed. The shells are brought in large lighters. When the street is graduated, after the manner of turnpiking, the shells are carted and spread over the streets to the depth of 4 or 5 inches—the spreading hardly forms a moment's obstruction to the passage along the street: as soon as they are spread, which is done by scattering them with a spade, carriages and horses pass over them, and they very soon form a crust, so well cemented as to be difficult to dig up with a pick-axe. They wear out, by very constant use, on the most frequented streets, but, by a little attention to *breaks* and thin places, when a street is once shelled, it is very easily kept in repair."

Dr. Dekay, in his "Sketches of Turkey," bears the following testimony to the generous philanthropy of the American and other Missionaries:

"The efforts of the physicians at Smyrna, during the fearful season of cholera, were nobly seconded by many of the foreign missionaries. Among those I heard the labors of Mr. Brewer every where spoken of in terms of admiration. Furnished with the requisite remedies, he scoured every lane and alley, proclaiming his benevolent intentions, and distributing even food to the needy.—Let history, when it repeats the story of the good bishop of Marseilles, who, after all, was merely a soldier at his post, also record the benevolence, and the contempt of danger and of death, evinced by an American stranger, within the pestilential walls of Smyrna."

The Anti Masons of Chester county contend that although defeated by a combination of all antagonist parties at the recent election, they have nevertheless increased in numbers.

Extracts from the Baltimore Prices Current, and Review of the Market, for the week ending Friday evening, Oct. 18.

GENERAL REMARK.—The scarcity of money, which has existed for some weeks past, and which continues to prevail very generally at the present moment, has had a very serious effect on business. In prosecuting our accustomed inquiries to day, we find the operations of the market—which, at this season of the year, are usually very brisk—much impeded and hampered for the want of money, and the great difficulty of obtaining it for undoubted business paper. The effect produced by this state of things, extends to almost every article of trade, and will account for the general meagreness of our Weekly Report.

COFFEE—The market is almost at a stand. A small parcel of Rio was sold at the beginning of the week at $12 75, but the other transactions, which are confined to small lots, were all at 12 1-2 cents. In other descriptions, there seems to be nothing at all doing.

COTTON—Transactions are limited. We note the sale of a lot of Louisiana at 18 1-2 cents, 6 months; and of small lots of Uplands, old crop, at 17 cents. Parcels are shipping from first hands.

FISH—Sales of Mackerel have been made at $6 50 a $6 75 for No. 1; at $5 50 for No. 2; and generally at $3 62 1-2 for No. 3. We continue to quote the same rates to day. Grand Bank Codfish we quote at $3 25. Nearly if not quite all the Susquehanna Herrings expected to come forward this season, have been taken at $4 for No. 1. We note sales of parcels of No. 1, at $4 12 1-2, and retail lots at $4 25. Sales of No. 1 untrimmed Susquehanna Shad, at $5 50 per bbl. During the week, there were inspected 538 bbls. and 294 half bbls. Mackerel.

HOWARD STREET FLOUR.—The receipts this week 1,000 bbls. more than the last. At the beginning of the week, some sales were made from stores at $6 and $5 87 1-2; but since Wednesday, there has been a further decline in the market, and sales have been made, including several parcels to day, at $5 75 per bbl. One or two sales were made at $5 75, on short credit, without interest. The store price to day may be quoted at $5 75. Since Wednesday, the wagon price has been generally $5 50; some loads have been taken at 5 62 1-2, but the bulk of the receipts at $5 50.

HIDES—A parcel of 1,200 heavy La Plata, Mentor's cargo, has been taken by the trade at 14 1-2 cents, 6 months.

RICE—Some parcels have been received this week. We quote at $3 25 a 3 62 1-2 per 100 lbs.—Sales within the range of quotations.

TOBACCO—The demand for Maryland Tobacco continues about the same as per last report, and prices are also without variation. Sales of 120 hhds. Md. at prices ranging from $4 to $8. Ground leaf is dull—sales at $5 50 a $7 50. There is a good inquiry for Ohio with little or none in market to meet it. The inspections of the week comprise 340 hhds. Maryland; 9 hhds. Ohio; and 1 hhd. Virginia—total 350 hhds.

WHISKEY—We continue to quote *hhds.* at 29 cents—not brisk. A sale of 100 bbls. was made to day at 32 cents; we quote the store price at 31 1-2 a 32 cents. The wagon price of bbls. is 27 a 27 1-2 cents, enclusive of the barrel. The inspections of the week comprise 11 hhds. and 852 barrels.

WAGON FREIGHTS—We quote to Pittsburgh $1 62 1-2, and to wheeling $2 per 100 lbs.

VALUABLE PROPERTY FOR SALE.

THE subscriber offers for sale his very valuable tract of land, upon Chartier's creek, about four miles from Pittsburgh, where the Pittsburgh and Steubenville Turnpike Road crosses it. The said tract contains one hundred and forty five acres of land, seventy of which are cleared, and under good fence.—The improvements upon this tract are—a good merchant mill, with three run of stones, and a saw mill, situated on a never failing stream of water, with eight feet head and fall; a stone distillery, forty feet square; a dwelling house, barn and stables.——For terms, apply to the subscriber, living on the premises.

SIX EGYPTIAN MUMMIES

In the Diamond, next door to the office of The Pittsburgh Gazette.

THE features of some of these mummies are in perfect expression—the hair of the head preserved as if now living. For the direct purpose of giving visitors, of all descriptions, that wish to see the ancients themselves, and likewise the bodies that were embalmed not less than three thousand years ago, this collection was exhibited to a numerous concourse of visitors, in the city of Philadelphia, for the space of 3 months; and next in Baltimore, in the Museum, for five weeks, where contract was only made for two weeks, and continued for five weeks by request. The inhabitants of this city, it is hoped, will call, and patronize a collection worthy the attention of the curious.

The proprietor is authorized to use the names of the most eminent physicians and professors in the city of Philadelphia, and likewise that of Baltimore.

Paper Mill for Sale.

THE Extensive Establishment, known as the Soft Spring Paper Mill, now in the occupancy of C. Lukens & Co. is offered for sale.—Its situation is both desirable and healthy, possessing local advantages superior to any mill in the west, with a spring of pure, soft water, yielding a superabundance for all purposes—propelled by an engine sufficiently powerful, and to which has recently been added an entire New Machine for the manufacture of paper. Its location is about two miles from the city, on the Eastern Turnpike. The subscribers have no hesitation in believing it offers inducements to purchasers highly advantageous.

The terms will be rendered satisfactory, and but a small portion of the purchase money required at the time of sale, with an extended credit for the residue, being determined to make an early disposal. It will be sold low. Application made personally, or by communication, to either of the subscribers, will be attended to.

TO ENGINEERS.

A CORRESPONDENT of the Subscribers, who resides in Tennessee, wishing to erect a Rolling Mill, at Louisville, Ky., Nashville, Tennessee, or some intermediate point, as may be deemed most advisable, is desirous of informing himself as to the cost of such an establishment, capable of rolling TWELVE TO FIFTEEN HUNDRED TONS OF IRON, of the various descriptions embraced in a general assortment.

As the location of the Mill is yet undetermined, a FULL PROPOSAL is not expected; we will, however, receive Estimates of the cost of the Engine and Machinery, and probable cost of the building; the Contractor to furnish ALL except the ground on which the building shall be erected. The mill to be delivered ready to go into operation. Such Estimates, expressing the terms of payment, and time required for the completion of the work, handed to the subscribers, on or before the 30th inst., shall be submitted at once, and it is presumed that the most favorable offer will result in a contract.

RIDDLE, FORSYTH & Co.
Pittsburgh, Oct. 12.

PIANO FORTES.

MR. TAYLOR respectfully announces to the citizens of Pittsburgh, that he has just received an assortment of PIANO FORTES, from the celebrated manufactory of Robert Nunns, Clark, and Co. (late R. & W. Nunns,) of New York, which he offers to the public at a fair price, and liberal terms.

The instruments of this most extensive establishment have (for quality and volume of tone, and for materials and workmanship) received the decided approbation of the most distinguished professors of this country and Europe. The manufacturers therefore feel confident in resting their claims to public patronage upon the intrinsic merits of the Piano Fortes themselves.

FLUTES.

Also, a few of 'Taylor's approved' Flutes; these instruments are well worth the attention of the Amateures of the Flute.

☞Ladies and Gentlemen are invited to call and examine the above instruments, at Cook and Schoyer's (late Sylvester's) store, corner of Wood and Third streets, where they will remain but a short time, Mr. Taylor's stay in this place being limited. Oct. 7, 1833.

SALE OF REAL ESTATE.

THE Subscribers, Trustees of the New Philadelphia Society, at Phillipsburgh, Beaver county, Pennsylvania, offer for sale the following property, to wit:

1	tract of land	containing	330 acres
1	do	do	330
1	do	do	67
1	do	do	7
1	do	do	40

other lots, containing about 6

The above lands lie in one body, fronting about two miles upon the Ohio river—immediately opposite the mouth of Big Beaver creek, and the Beaver Division of the Pennsylvania Canal. The land is rich, and a part of it under a high state of cultivation—its location pleasant and healthy. The improvements upon the same are valuable, including the town of Phillipsburgh, late the residence of Count Leon, and the New Philadelphia Society. The town contains about 40 Dwelling Houses, now in order; some of them brick houses and two stories high. A large and spacious Hotel, a Store house, Church, a number of Shops, for mechanics, Stables, Barns, and other out houses. Also, two large new buildings, lately erected, but not yet finished, one of brick, the other of frame (the latter suitable for a manufactory) a very extensive public garden, and also fruit trees of various kinds. The property has also attached to it the right of a ferry across the Ohio, which is valuable, and becoming more so every day.

The above property is situated in the midst of a wealthy and prosperous country, distant about 28 miles below Pittsburgh, and one mile from Beaver, the seat of justice for Beaver county---and having a view for many miles up and down the Ohio, and of the country to a great distance around.

The subscribers are confident in saying that few situations could be found, presenting greater facilities to the farmer, mechanic, the manufacturer, and others--- a soil rich and productive---the neighborhood abounding in coal---well timbered and watered, and, by means of the Pennsylvania Canal, and steamboat navigation, a cheap and ready conveyance to market, and a communication with other places is ensured.

The property is susceptible of divisions into farms, or for the location of new towns, or for the extension of the present one.

Should it not be sold on or before the first day of January next, it will then be offered at public sale, upon the premises, to the highest and best bidder.

It will be sold in a body, or in parcels, to suit purchasers.

Terms of sale will be reasonable.

Information can be had by enquiring of the subscribers, two of whom live in the neighborhood, and one on the premises.

PERIODICALS.

AMERICAN RAILROAD JOURNAL, and Advocate of Internal Improvements, which is designed as a repository of the accounts of the rise and progress of numerous works of Internal Improvement, in the United States particularly, and in other parts of the world generally. The work is published weekly, and forms a large octavo volume each year, of 832 pages of 3 columns each, for $3 per annum, in advance.

New York Farmer, and American Gardener's Magazine. This work is designed for the agriculturist, and will be found to contain much, both interesting and profitable, to those who cultivate the soil as a business, or merely a garden for amusement. Published in monthly parts of 32 large octavo pages, with three columns each, at $3 per annum, in advance.

Mechanics' Magazine, and Register of Improvements and Inventions. To the Mechanics of the United States---In this populous and enlightened country, almost every description of persons can obtain knowledge and amusement connected with their peculiar pursuits, through the medium of the Journal or Magazine, especially devoted to their interests. The Theologian, the Farmer, the Philosopher, the Sportsman, and even the Plough Boy, has each his Journal, where he can find a record of the passing events of the day, connected with his peculiar avocations and recreations. Hitherto, the Mechanics (who form a large and most important portion of the community) have had no Journal, to which they could turn, with the certainty of finding that information they desire, no periodical of which they could say: 'This is ours, and for us.' In the hope that the attempt to supply such a want at a price so reasonable as to be within the reach of all, will meet with your active support, the subscriber proposes to publish, on the first day of each month, a Mechanics' Magazine. It will contain a well digested selection of the most useful and interesting articles in the London Mechanics' Magazine, London Register of Arts and Sciences, Repertory of Inventions, Library of Useful Knowledge, Journal of the Franklin Institute, and other works, connected with the arts and manufactures, published in this country and in Europe, accompanied with numerous and well executed Engravings. Its pages will be open for the communications of all, and especially for those of the practical artisan, to whose interest it will be particularly devoted. The Mechanics' Magazine will contain, also, a due portion of the occurrences of the month, Scientific and Literary Reviews of Books, Anecdotes, Economical Receipts, Reports of the state of Mechanics' Institutions, and other Scientific Societies in this state and other countries. To be published monthly. Each succeeding number will contain 64 pages, handsomely printed, and stitched in a neat cover. Six numbers will form a volume, for which an index and title page will be supplied, and also a Portrait of some distinguished Mechanic, as a Frontispiece. Terms, $3 per annum, in advance.

DOCTOR ROBERT'S

☞*WELCH MEDICAMENTUM*☜

FOR the cure of Dyspepsia, Liver Complaints, Jaundice, Cholic, Fever and Ague, Dysentery, Headach, Loss of Appetite, Flatulence, Hypochondria, Hysterics, Dropsical Complaints, and Heartburn, It also prevents all Bilious disorders, and removes habitual Costiveness, Asthma, Strangury, Gravel, Rheumatism, Gout, and Impurities of the Blood.

A person who uses this Medicamentum will not require the use of the lancet, or any means of the healing art. It restores and revives the animal spirits, invigorates the system, removes nervous tremors, obtunds rheumatic and anthritic pains, and prevents their return. It cleanses the stomach of all morbid humors, which cause indigestion, acidities, headach, and lowness of spirits; cures all bilious disorders, and all cholics of the stomach and bowels, almost immediately; inspires cheerfulness; gives comfort to the dropsical; takes away palpitation of the heart; gives circulation to the blood; restores bloom to the sallow or sickly cheek, and plumpness to the meagre habit; purges without pain, and banishes all cause of fever of every kind. It acts on the stomach, that great reservoir of the human system, a diseased state of which causes all diseases. No alteration in the usual habits of life is required, but the abstaining from distilled ardent spirits.

CERTIFICATE,

From Rev. Derick Lansing, D. D., Pastor of the Second Presbyterian Church in Utica.

Utica, Jan. 6, 1830.

To Dr. Hitchcock.—Dear Sir: I have always been one of the number of those who have placed little confidence in *nostrums* or *specifics*, and for this reason, although I saw your advertisement of the Welch Medicamentum, I could not bring my mind to consent to use it. My sufferings, from indigestion, during the past summer, were so severe, as materially to affect my comfort, and my capacity for usefulness. I have reason to thank you, sir, that, on hearing of the state of my health, you kindly sent me your Medicamentum. I have taken it faithfully, and with entire success. I have not been visited with one of those turns of distress, which before were weekly periodical, since I began to take your valuable medicine. Could I receive the same relief which I have hitherto experienced, on condition of taking it for life, I should cheerfully comply with such condition. Your's, very truly, D. C. LANSING.

ANTI-DYSPEPTIC ELIXER.

ONE of the most agreeable and efficacious Medicines ever discovered for the permanent cure of those chronic states of derangement of the stomach, constituting that miserable disease called Dyspepsia.

The basis of this Elixer is vegetables, and perfectly innocent in its operation; it destroys that sour state of the stomach, the instant it is taken, and stops the morbid secretion, by giving strength to the muscular fibre of that important organ, by which means the peristaltic motion of the intestines is increased, and the costiveness obviated; a new action is given to the system, which puts an end to a train of distressing nervous sensations.

Another form of the disease in which the Elixer is admirably calculated to relieve, is the decline of fever, where the stomach will not bear the ordinary strengthening medicines indicated in such cases, it has the surprising effect of giving vigor, and restoring the natural secretions of the body, without increasing the febrile state. Not the least danger is to be apprehended from exposure to cold, while under the use of this medicine, nor will it interrupt necessary employment of the patient a single hour.

☞A number of cases of cures performed by the Anti-Dyspeptic Elixer in the vicinity of Pittsburgh can be given.

COMPOUND SYRUP OF LIVERWORT,

A SAFE and Valuable Medicine for Coughs, Spitting of Blood, Consumption, and Liver Complaints.

Most of the medicines made use of for the above diseases are of a stimulating nature, composed generally of Resins and Balsams, in alcoholic solutions, which, although sometimes givingt emporary relief, in almost every instance where they are freely used, aggravate the disease, and reduce the strength of the patient.

This article possesses superior advantages over these preparations, its action being of a tonic, invigorating and strengthening nature, thus overcoming the disease by promoting expectoration, and gradually increasing the strength of the patient, and thus, without being attended with any unpleasant effects: it also agrees with the stomach, in a cases, and is a pleasant medicine to take.

PATENT PLANING MACHINE.—The right to use this valuable machine, invented and patented by William Woodworth, and known as Woodworth's Patent Planing Machine, may be obtained on application to the subscriber for the counties of Allegheny, Butler, Beaver, Washington, Green, Fayette, Somerset, Cambria, Indiana, Jefferson, Clearfield, M'Kean, Warren, Venango, Mercer, Crawford, and Erie, in the State of Pennsylvania. That part of Maryland lying west of the Blue Ridge; all that part of Virginia lying west of the Blue Ridge, except the county of Ohio. The whole of the state of Ohio except the counties of Hamilton, Butler, and Montgomery. The whole of the state of Kentucky, except the counties of Jefferson, Boone, Oldham, Gallatin, and Campbell. The whole of Indiana, except the counties of Floyd, Clark, Jefferson, Dearborn, and Switzerland. The whole of the state of Illinois, and the territory of Michigan. Rights to use the machine in that part of the United States, named above, will be sold by the single county or in larger districts. As it is presumed that no one will purchase without seeing the machine at work, a description of it is deemed unnecessary. Should any person, however, wish to purchase, and find it inconvenient to visit the places where it is in operation, a machine will be furnished, warranted to plane, tongue and groove, and bring to an exact width and thickness, a white pine board of 12 feet long, and of any width from 1 to 14 inches, in one minute and ten seconds, or an oak board of the same dimensions in 2 minutes and 10 seconds. Machines may be seen at work in the cities of New Orleans, Washington, Philadelphia, New York, Boston, and others at the south and east, at Wheeling, Virginia, and at the saw mill of Messrs. Irwin & Herron, in this city.

Persons desiring to purchase will have the certificates of scientific and practical men who have seen it at work, in the different places in which it has been put up, forwarded to them. They give their opinion as to the great value of the invention, state the time they have seen boards dressed by this machine, and describe the quality of the work as compared with that performed by hand labor.

VALUABLE PROPERTY FOR SALE.

THE Subscriber offers for sale the farm on which he lives, in Washington county, on Pigeon creek, one mile south of Williamsport, on the Monongahela river, to which there is a perfectly level road. This farm contains near 400 acres, the greater part of which is first rate land. There is on the premises a Brick Dwelling House, a Merchant mill, in good repair, a new saw mill, a stone still house, 35 by 40 feet; a salt works is also in operation, and worked to advantage; about 150 acres of land cleared and under good fence. There is on the premises three small tenements for the accommodation of families. This tract is well timbered, and abounds with stone coal and springs of water, both of the best quality.

To a person wishing to embark in a manufacturing business, and possessing capital, this would be a very desirable situation, having the advantage of both water power from Pigeon creek, and banks of the very best coal near to the works, and easy of access, and its vicinity to so navigable a river where articles of any kind are so cheaply transported to Pittsburgh.

For further particulars, apply to James P. Stuart, Merchant, Wood street, Pittsburgh, or to the subscriber on the premises.

TYPE FOUNDRY.

HAVING purchased of Mr. Richard Ronaldson, his long established and very extensive Type Foundry, the subscribers have formed a co-partnership for the purpose of continuing said business, and for the convenience of their friends and patrons, have removed their establishment to a more central part of the city. As it is their intention to keep on hand a good assortment of the best type, and to make such additions and improvements as the taste of the trade and the wants of the country require, they flatter themselves that this establishment will merit a large share of patronage. They have now several founts on hand, which can be furnished at a few hours' notice, and are prepared to make founts of all weights and sizes, from Pearl to 22 lines Pica, including a variety of Ornamental Letter. Their assortment of Cuts, Dashes, Brass Rule, and other Ornaments, will be found to be very extensive, of which specimens will be forwarded to Printers as soon as they can be prepared.

Printing Presses of every description, Printing Ink of the most approved qualities, Composing Sticks, Brass and Common Galleys, Chases, Imposing Stones, Cases, Paper and Press Boards, Standing Presses, Furniture, together with a complete assortment of all articles used in a Printing Office, will be kept constantly on hand.

Small founts, suitable for Book Binders, in great variety, may be had when called for.
